Honorary Secretary

“Every accomplishment starts with the decision to try”

One needs a lot of faith in oneself to even take the first step in trying to accomplish their goal, but that one step can lead to a lifetime of success. The day we believe in ourselves, the day we remove all distractions, the day we promise to give our 100% in accomplishing our dream, no force can stop us. No matter how big we dream, no matter how unachievable a goal seems we can achieve it by trusting in ourselves and having a strong plan that we can believe in. So, my advice to our future generation is to pick a certain goal, have trust, have a plan, and put all your energy behind that goal until your goal is achieved.

Deepak Sharda

Hon. Secretary (MPS International)

From the Desk Of...

Respected Principal

“Every new day that you get to see is an opportunity to create a better and improved you, that

other people get the privilege to see”

Every day of your life is a new beginning, not just the first day of the year. You can make Daily Resolutions, not just New Year Resolutions. Any day is suitable for making them. Regard every day as the beginning of your new, better, and happier life. Start every day of the year with feelings of happiness and with the anticipation that great and wonderful things are going to happen. You should feel lucky that every day you wake up to see a new day and get to do things in a better way and you get the opportunity to correct your mistakes. Be grateful for everyday and show that gratitude by doing hard work for achieving something, by utilizing your talents for greater good. When you have achieved success in your dream you yourself will feel satisfied within yourself and you will feel happy that you were able to do something that makes you and people around you proud, so keep working hard and smart till you achieve what you are working towards.

Archana Singh

Principal (MPS International)

From the Desk Of...

Respected Vice Principal

New beginnings bring new habits, new promises, and new decisions. So, as you all begin with your new session you all shall promises to yourselves to be a better version of what you were in your last session, you shall be better in terms of discipline, obedience, studies, co-curricular activities, etc. In this new session along with fun and adventures, you all should also focus on doing your best on whatever task you may take upon yourself and make you parents, teachers and friends proud of you. This year choose a goal you have always wanted to achieve and show full concentration and determination towards that goal. Also work to make yourself proud and happy, don't choose just any goal but a goal that makes you happy, so that working towards that goal makes you delighted instead of stresses. When you do something that pleasures you, you do it with your heart hence you do it better than anyone. So, this new session work hard, work smart, give your 100% towards something you love and be a better version of yourself.

Manju Sharma

Vice Principal (MPS International)

"Interacted with the students of South Africa"

M.P.S. International students interacted with the students of 'Laithla Bele school in Botswana, South Africa through video conferencing. The program started with a prayer. The students interacted with each other on the language, civilization, culture, and education of both countries. Ideas were exchanged through questions on academic and co-scholastic activities in the schools of both countries. School Secretary Mr. Deepak Sharda and Principal Ms. Archana Singh said that we Indians follow the spirit of "Vasudhaiva Kutumbakam". Through such activities, students get acquainted with the civilization and culture of each other's country. Finally, the program concluded with the National Anthems of both countries.

Back to School: Open House Session Organized

Before starting the new session for the students of classes 9th and 11th in MPS International, 'Back to School' an open house session' was organized. The students along with their parents participated in this session. School Counselor Ms. Bhavna Uba emphasized skill development in 21st century. Describing the participation of the school, teachers, and parents as essential for the academic and personal upliftment of the students, she gave proper guidelines for building the right career for the students.

School Principal Ms. Archana Singh motivated the students to increase their commitment to following the school rules in the coming session.

Vice Principal Ms. Manju Sharma informed the students about the educational plans to be held in the new session as well as educational tours and field trips. School management member, Ms. Preeti Jhanwar informed about the school arrangements while discussing with the parents.

School Secretary Mr. Deepak Sharda said that at the beginning of the new session, such meetings create a rapport between the parents and the school. He assured that such sessions will continue to be organized in the future as well.

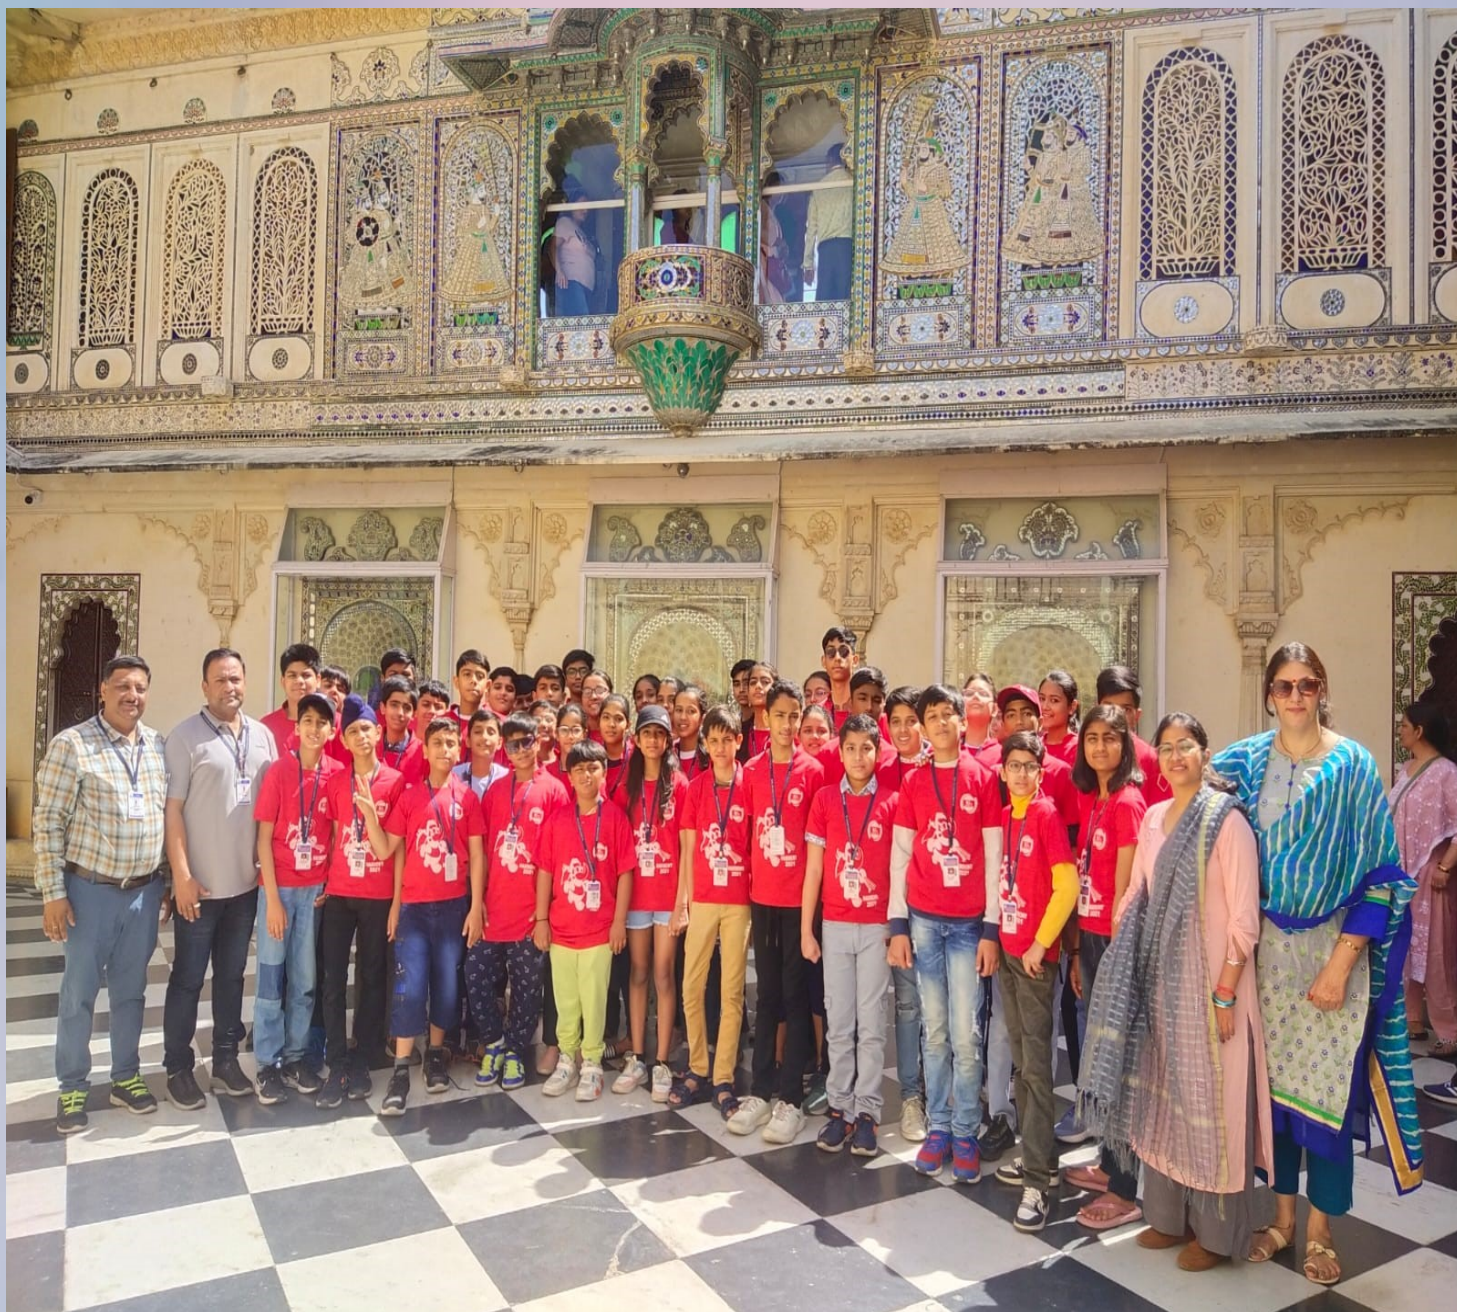

Parents also asked questions to clear their doubts. The parents thanked the entire school family for making this session beneficial.

Students enjoyed the educational tour

Students of classes VI to VIII of MPS International enjoyed an educational trip to Mount Abu and Udaipur. The students along with the teachers left for Mount Abu by bus for a three-day excursion. The children started their journey while being entertained by antakshari, jokes, and songs. They were accommodated in a 3-star hotel in Mount Abu, where children took advantage of food, snacks, and other facilities. Students left for Udaipur after visiting Dilwara Jain Temple, Guru Shikhar, Nakki Lake, Sunset Point, and Arbuda Devi Temple in Mount Abu. While visiting the historical tourist place Haldighati, the students also visited Fateh Sagar Lake, City Palace, and Saheliyon Ki Bari. The children learned about the historical and mythological importance of these places. During this, the children learned to live together in peace and harmony. The students said that these moments of the excursion would always remain a pleasant memory in their lives. Principal Ms. Archana Singh said that this type of educational tour makes students self-reliant. They get information about different places. Along with this, their all-around development takes place.

Maths a challenge

Try, try and try
The more I try
The more I cry
I practice maths with my heart and soul
Yet I am not able to achieve my goal
I really want to improve my maths
Because I love this subject
And for this I am trying my level best
I never get good marks in maths, in spite of my great
endeavours fate is never in my favour.
I am candid so I confess
In mathematics examination I always create a mess
In spite of all the answers I guess
Ultimately the marks I get are quite less
I believe that if I do ample of practice, I'll one day
probably achieve my goal
And I seriously have to improve, because in our lives
maths plays a very significant role

LIFE

Life is full of sadness and happiness. After every sad moment a happy moment follows the path. We should be courageous enough to face the problems in our life. Since God gives us sad and happy things together, we should treat them equally. We should be thankful to God for happy moments. Some things make us feel happy while some make us sad. If a person does something wrong in his life, he will have to repay it for the sake of the rules and regulations created by god. He should hang an albatross around his neck. It means that he should remember his sin forever so that he does not commit it again. Life is like a cycle which has sad and happy moments and those keep on revolving by themselves. History repeats itself, this is the universal truth and thus the sins we commit in the past gives back its result. We should treat all circumstances equally and we should not treat any moment superior and any of them inferior. We should be grateful to have a life, rather than being sad for bad circumstances in our life.

Sunday - not a day of fun, a day of success

For an ambitious student, Sunday is the most important day of the week. Even though it seems idea to wake up late on a Sunday morning and to be with your old friend-the TV, but you really must resist. Why? Because Sunday sets the tone for the week that follows. This is absolutely true, if you attack the day on Sunday, you will start your week with momentum behind you. If you let the day attack you, your whole week will pass without doing anything superb. So how do you overcome this indolence? The secret is to engage in a focusing ritual every Sunday morning—something that wakes your mind up and gets your day moving. Read the paper with a cup of hot milk, take a walk with a friend, go for a jog followed by a hot shower, or spend some time In a nearby library. Then, with your energy and your strong focus, settle into a quiet spot at the library and start working. While other students drowse, you will have a full undisturbed day to get ahead of your work obligations.

This weekend ritual will also help you make that vital mental switch from Weekend amusements to focus. When you party on Sunday night, Monday morning is all the more depressing. The satisfaction you'll get from starting the week in full command of your responsibilities will provide the good mood and momentum. If you take control of your Sunday, you take control of your week.

Sunday is not a day of fun, it is a day of success....

Adage Of The Sage

Self- study

Formal education will, make you a living, Self- education will, make you a fortune. It is truly said that self- education makes you a fortune. It has been observed that students, they go to school daily but are still not able to score good marks. The reason behind this is lack of self- study. In present scenario students are dependent on teachers, tutors or family members for study, but they don't want to do self- study. Self- study is very important for students. When they sit alone and study with full concentration, they come to know where they are facing problems and if the concepts are clear to them.

Here are some tips for self-study:

1. Study in morning time: It is scientifically proven that in the morning time, our brain works at high speed. This is a very common habit of all successful men, that they start their day very early when the whole world is sleeping. The best time for self- study is 4:30 a.m. to 6:30 a.m.
2. Concept mapping: Once you finish reading your chapter, start mapping notes, and note down the important points which will surely help you when you revise your chapter for the exam.
3. Flash notes: Make flash notes and paste them on the walls of your study room, almirah or study table. Looking at these things again and again will help you remember things for a longer time.
4. Stop using social media: Students should stop using Instagram, Facebook or WhatsApp during study time, It is totally a wastage of time and also distracts the students.
5. Get rid of comfort zone: Comfort kills your productivity. It has been noticed that many times students complain about resources, tutors, noises or for not having enough time. Stop all these complains. Students, once you are out of your comfort zone, you will be more productive, more creative and you will be more adaptable to change.

लघुकथा

छोटी पहल, बड़ा मुकाम' बहन जी किधर जाना है? आवाज सुनकर मैं चौंक गई पीछे मुड़कर देखा तो आवाज एक ऑटो रिक्शा वाले की थी। सामान्य कद काठी, साधारण नैन नक्श आँखों में आत्मविश्वास व चेहरे पर संतोष की झलक। उसने पुनः पूछा। मैंने जवाब दिया यही बस 2 किलोमीटर आगे ले चलेंगे बहन जी, आप बैठिए तो सही। उसकी आवाज़ में कुछ ऐसा जादू था कि मैं उसे मना नहीं कर सकी। मेरे बैठते ही वह मधुर स्वर में गुनगुनाते हुए ऑटो चलाने लगा। मैं उसके गीत सुनते हुए बाहर के दृश्य देखने में मगन हो गई। अचानक मेरी नजर ऑटो में लगे पौधों पर गई। मैंने छूकर देखा तो पौधे असली थे। मैंने चारों तरफ नज़र घुमा कर देखा तो पाया की स्टैंड में गमले लगे थे और उनमें हँसते- खिलखिलाते पौधे उगे थे। दो पौधे आगे और चार पीछे की ओर लगे हुए थे। फर्श पर भी हरी घास का कारपेट बिछा था और ऑटो की छत पर भी ऐसा ही कारपेट लगा था। यूँ लग रहा था मानो यह ऑटो प्रकृति का जीवंत नमूना हो। मैंने उससे पूछा भैया यह तुम्हारा शौक है जो तुमने ऑटो में पौधे लगा रखे हैं। उसने मुस्कुराते हुए जवाब दिया 'बहन जी ! मैं गरीब आदमी हूँ पैसा, जगह और समय तीनों नहीं है मेरे पास, लेकिन कोशिश करता हूँ जितना भी हो सके प्रकृति से जुड़ा रहूँ। मैं नतमस्तक हो गई यह देख कर कि पर्यावरण संरक्षण की मुहिम चलाने वाले, पर्यावरण संरक्षण का दावा ठोंकने वाले हम इस ऑटो चालक के सामने कितने बौने हैं। जिसने अपने एक छोटे से प्रयास से हमें एक बहुत बड़ी सीख दी है। मेरा गंतव्य आ गया था और मैं यही सब सोचते हुए अपने घर की ओर बढ़ चली।

Adage Of The Sage

It's the human in humanities that is worth studying

Humanities, it's too boring. I love other subjects but humanities, –it's too hard for me. These kinds of statements are common these days but as a Social Science teacher when I hear these statements, it hurts a lot. Humanities is not only a subject, it's a lifelong learning process. As we all know that humans are social creatures, they need society for their survival, just like a tree needs its roots to live.

Many times people demand for this subject to be removed from primary, as it demands critical thinking, but in my opinion, humanities should be taught at the youngest possible age. Subjects like history, political science, geography and literature, tell us the story of ourselves, our country and our world.

By nature our kids are explorers. They will want to know everything about our past and our surroundings. This subject helps them to understand others through their language, race, and ethnicity. It teaches us social justice and equality and reveals how people have tried to make moral, spiritual and intellectual sense of the world. Humanity students build skills in writing, critical reading and encourages them to think creatively. It develops informed and critical citizens. Without humanities, democracy could not flourish. In the end nothing else but it's the human in humanities that is worth studying.
